

CRL
Collaborative
Print Archives
Framework

April 2010

Shared Print Archive Initiatives in North America

De facto = Stored materials covered by explicit archiving agreement

Built = Proactively created by selection and consolidation

CRL Proposal

CRL proposes to work with partner consortia to develop a collaborative framework for archiving print journals, newspapers, and government documents in North America (and beyond)

1) To foster long-term preservation and accessibility of research materials

and

2) To systematically and significantly reduce costs

Planning and Partnership Phase

Deliverable: A plan, design, and cost estimates for:

- Service agreement(s)
- Procedures and systems to
 - disclose archived holdings
 - facilitate collection management decisions
- Business model identifying cost factors and cost-sharing principles

Timeframe: March through September 2010

Consortial and CRL Strengths

Consortia

- Long-term relationships with libraries in their regions or domains
- Operational resource-sharing programs among members
- Groundswell of shared print programs underway (30+ in North America)

CRL

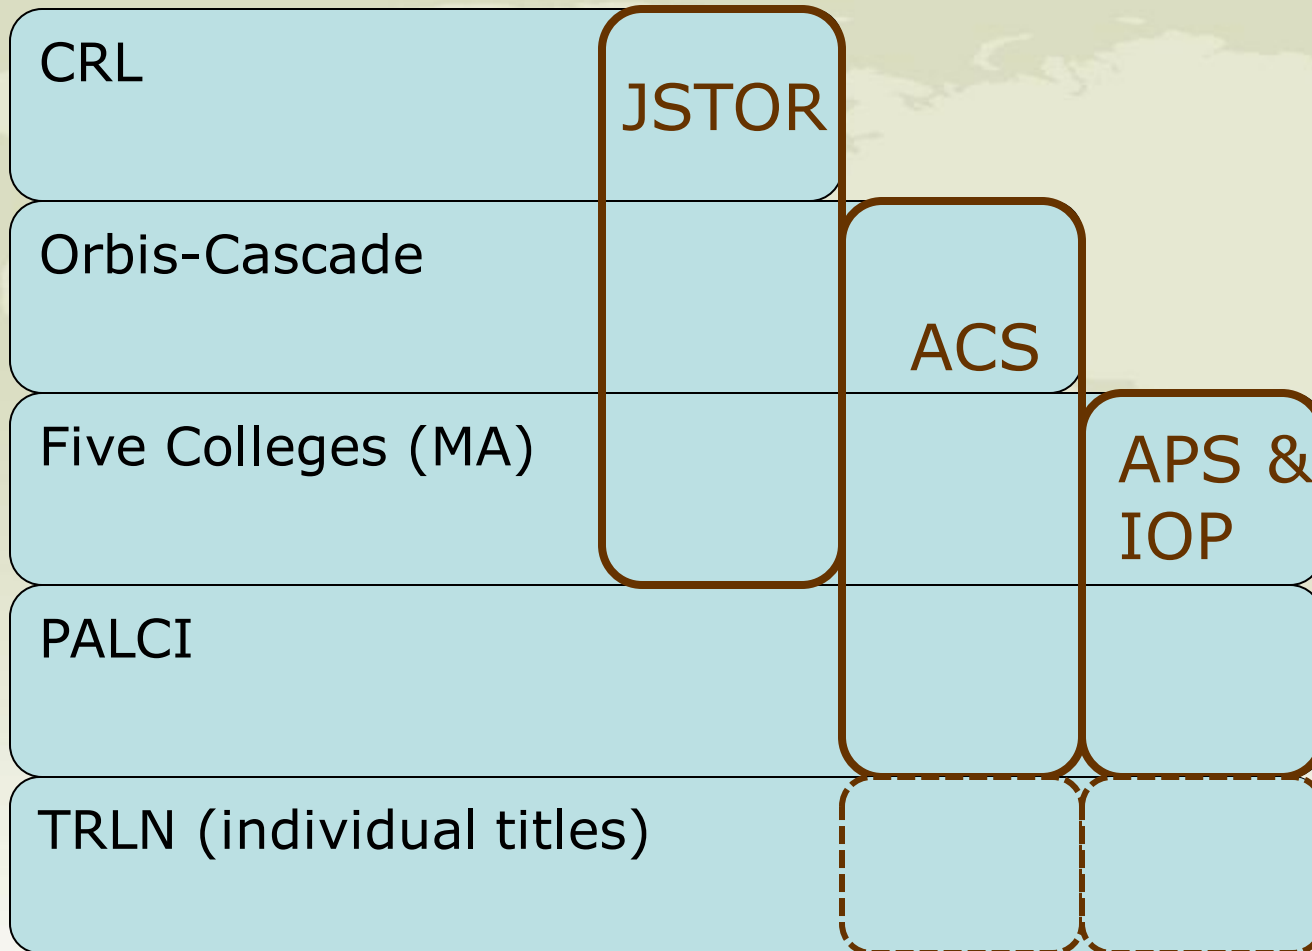

- Long-term focus on print preservation
- Over 250 libraries in North America and beyond, members of most other consortia
- Network-level service deployment and administration

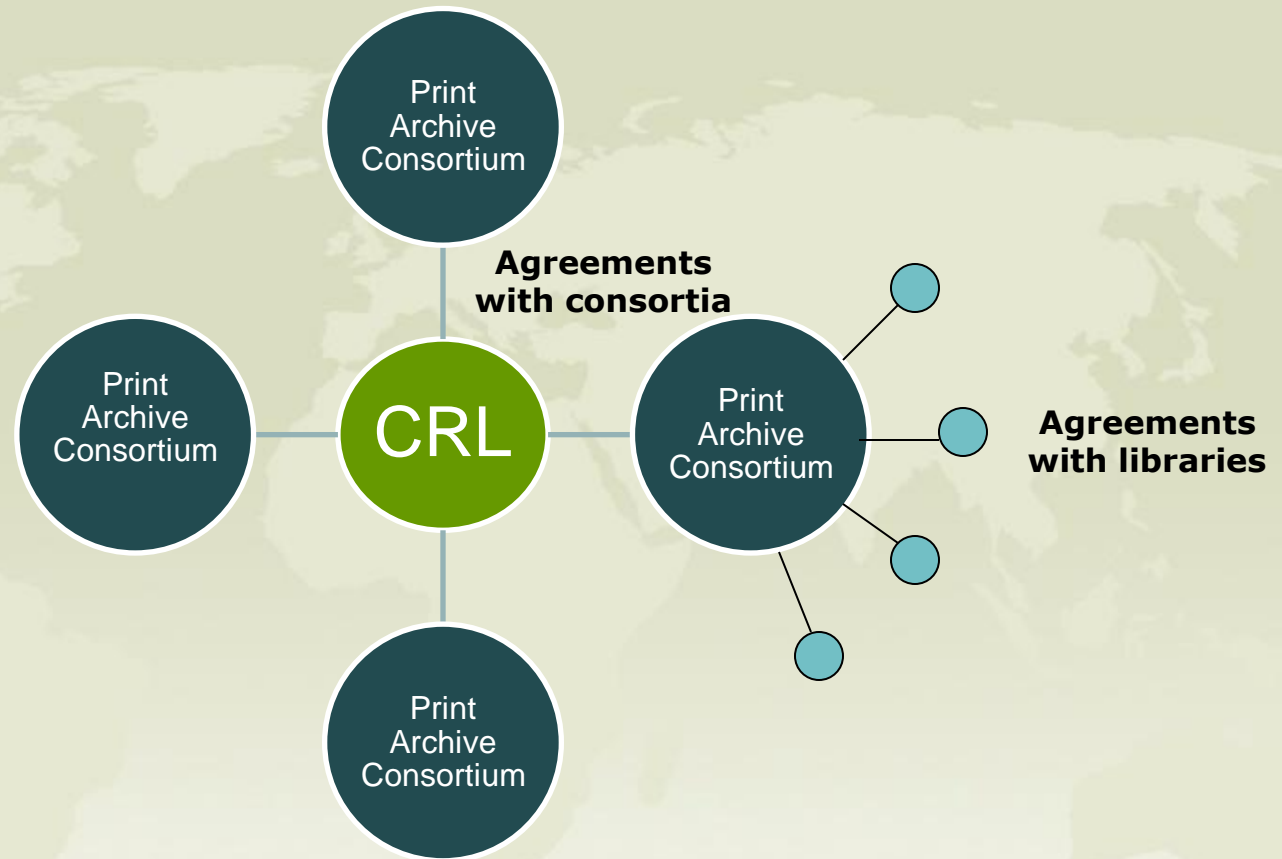

CRL as Integrating Framework

Prototype Project : Build on Existing Publisher-Based Archives

Multilateral Service Agreements

Consortium members would have access to other consortium archives through CRL agreement

Archive Registry: Prototype Listing of Print Archive Holdings

Systems and Procedures

- Use current OCLC capabilities to support print archiving to the extent possible
- Develop a specialized database for more detailed comparison of print archive holdings at the volume/year level
 - *Benefits from centralization, important added value at network level*
- Work with OCLC to develop features to support print archives (e.g. communal LHR or similar)

Funding Model

- Divide the central framework costs among participating consortia according to a formula (TBD).
 - Program management and administration
 - Collection analysis system and processing
- Give financial compensation to archive providers as incentive to participate
 - Through CRL?
 - Through regional consortium?

**“...long-term investments in redundant print collections
create a counterweight to innovation ...”**
