a. Brief Updates

1. WPA : Bringing in materials from other states and making use of the gap reports. Beginning to digitize Kentucky materials. Recently identified WPA items in the Masterlist from records contributed by the Library of Virginia and Auburn University which are not owned by UK. Will be contacting both institutions shortly.
2. ED : 60-70% through the ERIC microfiche part of the project, may slow down due to loss of grad student (graduation). Has already hired a replacement with cataloging experience, will have an overlap of about 4 weeks for training. Library of Virginia will contribute catalog records for ED fiche. KY is almost finished with their ED paper collection inventory and expects to contribute records at the completion of that project. The University of Georgia has also agreed to provide ED records when they complete the inventory of their collection – expect to complete sometime in May.
3. PCZ: More digitization in progress. Scanned items are available on Internet Archive as well as harvested to the UF digital collection. Pleased to have obtained a unique item for the collection from UK which they previously did not own nor were aware of.
4. Database Uploading: Some libraries are including leading zeros with their OCLC numbers, and some are not. As there is not a standard length to an OCLC number, we propose to not include leading zeros when uploading files—accepted by group. Documentation will be updated to reflect this change.
5. Training Committee: Mary has created a basic “how to be a COE” PowerPoint that we can use as a basis for presentations. The document will be posted to the ASERL website after review by committee members (expect to post at same time committee meeting notes are posted). Chelsea will be presenting to the Florida Library Association next week and plans to incorporate the PowerPoint in her presentation. Chelsea and Valerie Glenn are also currently writing a paper on the project – no information on release date.
