Tool for Measuring Print Archiving Activity

[Print Archives Preservation Registry](#) (PAPR): Collection management tool that provides online data about print archiving programs and archived materials, and analysis of library collections to support archiving and retention decisions

Registry includes:
- Information about 31 print archive programs or collections,
- 70,500 bibliographic records and associated holdings from 14 programs/collections and 98 institutions,
- 14,500 CLOCKSS and PORTICO bibliographic records and associated holding

Statistics available:
- Record counts by program, LC Classification, Year of Commitment, Validation level, and Number of Copies per title.

Reports:
- Downloading data
- Collection comparison reports

Scholars Trust

View Archived Titles   Download Archived Holdings   Download Gaps and Condition Report

Program Description

An agreement betweenThe Association of Southeastern Research Libraries (ASERL) and the Washington Research Library Consortium (WRLC) to cooperatively retain low use print journals. Journals will be made available to members through existing ILL services for research purposes. The retention agreement, effective through December 31, 2035, involves all nine WRLC libraries and 24 ASERL libraries.

Washington Research Library Consortium Shared Collection Facility (SCF)

Facility Description

WRLC operates a shared offsite storage facility designed to free space for member libraries. The storage facility provides high-density, environmentally-controlled, retrievable storage for books, audiovisual or microform media, and archival boxes. Individual items are sorted by size in order to store the maximum number of items in the minimum floor area. Students and faculty of WRLC libraries may submit online requests for items stored at the "WRLC Center" using WRLC's shared catalog.

Keyword ▾ | Enter search terms | Search

PAPR provides a searchable database of titles and holdings archived by participating archiving programs.

Search Instructions

You may search by title keyword, keyword, ISSN, OCLC number, subject, or publisher in the search box at the top right.

Keyword searches can contain any combination of the following fields:

- Title
- ISSN
- LCCN
- OCLC number (as reported by archiving institution)
- Subject
- Publisher
- Program or program abbreviation
- OCLC Institution Symbol
- Library or storage facility name

Keyword searches using multiple terms will automatically be joined by an "and." Using the term "and" will search for the word "and" in records searches are not supported. Keyword searches are limited to 1,000 results.

Searches by Title, ISSN, OCLC number, Subject, and Publisher will display records with fields that begin with the search text you entered. S searches use Library of Congress Subject headings. Searches are not case sensitive.

Download Instructions

You may download the set of titles with holdings resulting from any search from a link on the Search Results screen ("Download Archived Holdings"). The titles download delivers a .tsv (tab-separated-values) file that can be converted to a spreadsheet.

You may also download Gaps and Condition reports for titles resulting from any search ("Download Gaps and Condition").

Materials	Archive Action	Date of Action	Status/Note
v.1-v.19 (1986-2004)	committed to retain	2013	

Processed 19,145 records output from JRNL

Step 1: Check record format, scope (serial), record identifiers, publication range

Results:

17,258 passed all checks

1,887 had one or more problems

1. Bad OCLC: 139
2. Bad record received: 7
3. Holdings are outside the expected publication dates: 1,456
4. Mapping for field already exists: 2
5. Missing OCLC: 35
6. OCLC mismatch (updated or found) for: 72
7. Record is not a hard-copy: 59
8. Record is not a serial: 142

Step 2: Normalize holdings

17,258 records that passed step 1

Examples of standardize holdings:

- v.1-v.10 (1900-1909)
- v.1, no.3-v.10, no.6 (Mar 1900-Jun 1909)
- v.1-v.10 (1900-1909); Supp.1 (1902); Index 2 (1904)

Standardize expression of volume, issue, new serial, supplement, index, etc.

Of the 17,258, approx. 4,400 indicated an error or normalization failure. Original holdings were entered.

Decisions Needed

1. Would you like CRL to give you the LHRs we create for PAPR for loading holdings into Worldcat?

Data correction

2. Can you set a policy across program to use correct records?
    *   Format, serial record, title changes
3. What will be the process for reporting errors to Scholars Trust?
4. Will incorrect records be changed locally if we report them to you?
5. What would be timeframe for correcting errors?

Disclosure in PAPR

6. What would be the schedule for loading records to PAPR?
7. How do we keep JRNL, local library, PAPR, Worldcat in sync?
8. What is an acceptable level of discrepancy between the databases?
