Intertwingularity with Digital Humanities at the University of Florida

Laurie N. Taylor (Digital Scholarship Librarian) and Blake Landor (Classics, Philosophy and Religion Librarian) profile recent DH developments at the University of Florida. These interconnected developments, including the formation of a dedicated library group, the development of a training course for librarians, and the launch of the Scott Nygren Scholars Studio, draw on related and distributed expertise across the campus.

Background

The University of Florida is a comprehensive, public, land-grant, research university, among the largest and most academically diverse public universities in the US. The UF Libraries form the largest information resource system in the state of Florida (the third most populous state).
Always Collections

Content must be accessible to diverse communities

Innovative performances created with oral histories.

UF’s SPOHP and CGSWSR supported interviews with the Women’s March on Washington, in talks for hosting oral histories at UF.

- Expertise
UF DH GRADUATE CERTIFICATE

Credentialing and building the community of practice

Model and development path for a DH Certificate:
- Defined by the DH Board, truly interdisciplinary, radical control
- Builds on pre-existing courses, treats DH as a way of enhancing current teaching and scholarly approaches, approaches DH as an opportunity for transformative and radical collaboration
- Connects the humanities to digital initiatives for how digital techniques offer ways of altering our engagement with the humanities, as public humanities
- Builds towards collaborative Research Groups: dLOC, Baldwin, Imagining Climate Change, LibraryPress@UF, UF Press, and more!

NEH Next Generation PhD Grant proposal: http://ufdc.ufl.edu/AA00038894
Train-the-graduate-student-trainer program: Our goal was to train graduate students in digital tools and project management, so they could in turn train other graduate students in digital scholarship.

Integrating UF Libraries into Classroom Instruction

• Instructors are encouraged to capitalize on library resources to encourage student interests and digital humanities at the University of Florida
• By integrating the library, courses offer ways to promote digital scholarship and new ways to teach, research, and learn
• Digital humanities presents innovative ways for student engagement in the classroom
Scott Nygren Scholars Studio

Provides an emerging community center for digital humanities and digital scholarship at the University of Florida. Open to faculty and graduate students to support collaborative dh/ds research and practice, the Studio offers:

- **Software** for digital exploration of texts and images: Adobe Creative Suite, Java Development Kit, Python, & more
- Large **LED screens**, including a touchscreen to encourage creative thoughts and design, and presentation connections to both studio computers and wireless **AirMedia** for laptops or tablets
- **Flexible seating** for small or large groups with comfortable, easy-to-move furniture
