

The table provided below summarizes the proposed stages of the revised disposition process.

Elapsed Days	Libraries with Access	Comments
Day 1 - 45	Primary Regional Library(ies)	This is the Regional with responsibility for the discarding library. In the case of states with two Regionals (Louisiana and Alabama), both Regionals would be considered Primary.
Day 6 - 45	Selective Libraries served by the Primary Regional Library(ies)	These are Selectives from the same state as the discarding library or served by the same multi-state Regional. It also includes all Selectives in a state with two Regionals.
Day 11 - 45	All Center of Excellence (COE) Libraries	This applies only to discards within their areas of COE responsibility.
Day 26 - 45	All Remaining Regional Libraries in the Southeast	Regionals will already have access to discards from their own states/territories and their individual areas of COE responsibilities. This will expand their access to all other available discards.
Day 31 - 45	All Depository Libraries in the Southeast	In this final stage, all depository libraries in the southeast have access to the unclaimed discards.

After 45 days, the offering library may discard any items not requested by another library within the Southeast Region, unless the items are rare or likely to be of significant interest beyond the region and therefore should be included in the national Needs and Offers List maintained by the Superintendent of Documents.
