

Docuseek2 Licensing Options

The Docuseek2 Complete Collection

1. The Docuseek2 Complete Collection contains all of the titles in the Essential Collection, plus about 400 older titles from our participating distributors. It will launch with about 810 titles, but will be filled out to 1200 titles by December 31, 2017. Select this collection for the most comprehensive set of documentary film.

The Docuseek2 Essential Collection

2. The Docuseek2 Essential Collection contains the most recent and most popular titles from our participating distributors. At its launch, the Essential Collection contains about 700 titles, but will be filled out with new releases from our participating distributors, to reach 800 titles by December 31, 2017.

Complete and Essential Collection licensing options

3. The Docuseek2 Essential Collection and the Docuseek2 Complete Collection are available in four licensing models: 1 year subscription; 3 year subscription; Life of File Evidence-Based Acquisition (see the next session); and Life of File licenses for all films in the collection.

Our Evidence-Based Acquisition (EBA) model requires an upfront payment for 40 Life of File licenses. For the next twelve months, you will have access to the selected collection (either Essential or Complete -- see above). At the end of the twelve months, you then select the 40 titles to keep. See the Life of File description below for details on our Life of File program.

Individual Title licenses

5. We also license individual titles for one week, one semester (110 days), one year, three years or Life of File (see below). Per title prices drop based on the number of titles licensed, with price breaks at 15 titles, 30 titles, 60 titles, 100 titles and 200+ titles.

Tokens

6. You may purchase tokens for one year, three years or Life of File licenses (minimum quantity of 15) that can be exchanged at a later date for a title license. Token purchases enable you to qualify for the better per-title price when you don't know exactly which titles you need. Tokens are priced the same as title licenses. We prefer that the tokens are used within a year. To exchange a token, just drop us an email. The license period for the film begins when the token is exchanged.

Thematic sets, samplers and series

7. We have curated thematic sets of titles that typically have a more attractive license fee than if the titles were licensed individually. Thematic sets exist for many academic disciplines. We also have smaller thematic samplers attractively priced to help schools get started with streaming. Many titles belong to a series. These series may be licensed as one product. The series license fee is also typically better than licensing as single titles.

About Life of File

8. Our Life of File option licenses the right to stream a file for the life of the H.264/.mp4 codec/file format from your equipment or from ours. If we stream files for you, an annual server fee applies.

Docuseek2 streams the best in documentary and social issue media to colleges and universities. Free trials are available. For more information, contact Elena Wayne at ewayne@docuseek2.com or 847-537-0606. Register and login at <http://docuseek2.com> to see pricing for your institution.
